

RUSSEL BONILLA

SOFTWARE ENGINEERING STUDENT

ABOUT ME

I'm a lover of the knowledge, I love learning new things, and that's why I'm autodidact.

I'm a creative person with a ton of energy, I enjoy meeting new people and I really like to learn even from failures and make the best of every situation.

EDUCATION

2019 - 2022

Hight School State #3 CTM
Math electives

2022 - currently

Bachelor's degree
Software engineering student
UADY

LANGUAGES

- Spanish (Native)
- Intermediate English level
- Italian (Basic level)

EXPIRENCE

Although I was involved in a project to create an App with Scratch, I consider that I do not have enough experience in the area of software engineering, however I have a lot motivation and a desire to learn.

In terms of work experience, I have been a volunteer supporting the making of face masks during the time of the pandemic.

As far as my experience as a leader is concerned, I was a leader of my group in the high school, and captain of my high school soccer team, so I think I have the experience to lead teams and deal with people.

SKILLS

SOFT-SKILLS

Leadership

Adaptability

Problem-solving
